

HRA Diversity Survey

Overview

The Human Reference Atlas diversity survey was designed to provide a baseline measurement of the diversity of the people building and using the Human Reference Atlas. The survey is conducted annually to measure how the Human Reference Atlas community evolves over time. This baseline survey was shared with 297 individuals and the response rate was 7.7%. The first survey was run in April of 2023 and the survey will be rerun in March-April of 2024.

Respondents hold the following roles in the Human Reference Atlas:

- ASCT+B Table author
- ASCT+B Table reviewer
- Infrastructure designer
- Interface designer
- Organizer
- User
- Interface tester
- Other
- I prefer not to respond
